## Contents

<i>S. D. Purohit, R. K. Raina</i>	
Some classes of analytic and multivalent functions associated with $q$ -derivative operators .....	5
<i>G. C. Rana</i>	
Hydromagnetic thermoslatal instability of Rivlin-Ericksen rotating fluid permeated with suspended particles and variable gravity field in porous medium .....	24
<i>T. M. Seoudy, M. K. Aouf</i>	
Some applications of differential subordination to certain subclass of $p$ -valent meromorphic functions involving convolution .....	46
<i>Cs. Szántó</i>	
On some Ringel-Hall numbers in tame cases .....	61
<i>Á. Száz</i>	
A particular Galois connection between relations and set functions .....	73
<i>I. Szöllősi</i>	
On the combinatorics of extensions of preinjective Kronecker modules .....	92
<i>E. Wolf</i>	
Composition followed by differentiation between weighted Bergman spaces and weighted Banach spaces of holomorphic functions ..	107
